ABOUT US

Parkomate is a sensor-based parking solutions provider company founded in Mumbai. It's a brain-child of an exhaustive research carried by our skilled engineers and analysts over the last two years to offer intelligible parking solutions.

We use sophisticated state of art technology aimed at improving the parking hurdles faced by the Parking lot managers and vehicle owners on daily basis.

Parkomate's solution experts along with its technical team have designed a cost effective and an innovative array of products. These products have made the parking area maintenance an easy task, giving a futuristic and technologically advanced look to the entire establishment.

We specialize in delivering end-to-end solutions including **Designing, Developing, Supply, Installation, Testing, and Commissioning** of all kinds of parking sensors and services.

Our vision is to revolutionize businesses that provide parking service by showcasing the use new-sensor based models for efficient parking management leading to increased revenue generation.

WHY CHOOSE PARKOMATE?

- Parkomate provides the best tailor-made solution with combination of its products to perfectly suit each parking lot
- Maintaining high quality standards, our sensors are manufactured in-house in Maharashtra, which helps to eliminate the extra transportation and taxation costs which benefits our Mumbai based customers*
- Our clients are each allotted a service representative to make sure that that issues, if any arise, are attended to within 48 working hours
- We provide a free demo to showcase the real-time efficiency of the product**
- Supported by a huge team of skilled engineers and technicians with the latest knowledge in modern parking solutions industry we strive to provide the best product and an efficient service to our customers.

How does Parkomate help you to generate revenue?

Our team will conduct an in-depth study of your parking lot considering factors like total parking area, current human resources and more. Using this study Parkomate will provide you with a comprehensive Return On Investment (ROI) document with a detailed report which will help you generate increased revenue with Parkomate's automated parking solutions.

Be it product information or for a FREE demo of our products, reach out to us on 9029227019 / 8082379741 and we will get back to you with a guaranteed solution!

Sensor Based Automation Products

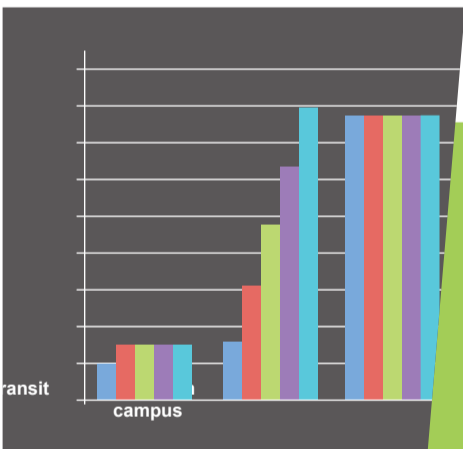

SPACE SPECIFIC PARKING INDICATOR (SSPI)

- Sensor on each space with availability indicator, special indicator for handicap parking
- Counters showing floor/aisle availability
- Ability to store and provide day/month wise parking occupancy data
- Easy to detect available space because of availability indicator
- Counters make is clear which section has most space available
