ABOUT US

Parkomate is your one-stop solution for all parking infrastructure needs. From safety products and traffic demarcation to access management and guidance systems, we provide comprehensive, tailored solutions. With expert planning, execution, and real-time monitoring, we simplify parking management, eliminating the need for multiple vendors. Trust Parkomate for seamless, efficient, & hassle-free parking operations.

6 SIMPLE STEPS TOWARDS HASSLE-FREE PARKING

CONSULTATION
Discuss client needs,
budget, & timeline.

SOLUTION DESIGN
Create a customized solution
based on client requirements.

INSTALLATION
Implement the system with
minimal disruption.

TRAINING
Educate staff on using &
managing the system.

GO-LIVE
Launch the system
& monitor initial performance.

SUPPORT
Provide ongoing maintenance
& address any issues.

ACCESS CONTROL SYSTEM

Effortless and secure parking with our Vehicle Access Control Systems. Featuring Boom Barriers, ANPR cameras, and RFID technology, enjoy seamless entry, exit, and real-time monitoring. Reliable solutions for residential and commercial spaces.

Boom Barriers

Secure and manage vehicle access with automated or manual barriers, ideal for gated communities and commercial facilities

RFID/UHF Reader

Streamline vehicle entry & exit with automated identification using RFID tags or UHF technology for efficiency and convenience

ANPR

Advanced license plate recognition (ANPR) ensures secure, contactless vehicle entry/exit, integrating with barriers and supporting multi-lane access

PARKING SAFETY SOLUTIONS

Ensure parking safety with speed breakers, reflective markers, warning lights, and sensor alerts. Ideal for ramps, narrow pathways, and high-traffic zones, our systems enhance control and reduce risks.

Speed Breakers

Reduce vehicle speed in sensitive areas like schools, hospitals, and residential zones to enhance safety for all

Corner Guards

Protect both vehicle edges and building corners from accidental damage, ensuring durability and reducing repair costs

Convex Mirrors

Improve visibility at blind spots, making intersections, parking lots, and narrow turns safer for all.

Signages

Communicate essential traffic regulations and guidance with highly visible, weather-resistant signs for improved awareness

Reflective Markers

Provide guidance in low-visibility conditions like fog or night-time, improving road and parking lot safety

PARKING GUIDANCE SYSTEMS

Our Parking Guidance Systems use smart sensors to provide real-time space availability, helping drivers find parking effortlessly. They optimize space, reduce congestion, and improve the overall experience. Perfect for commercial & residential facilities.

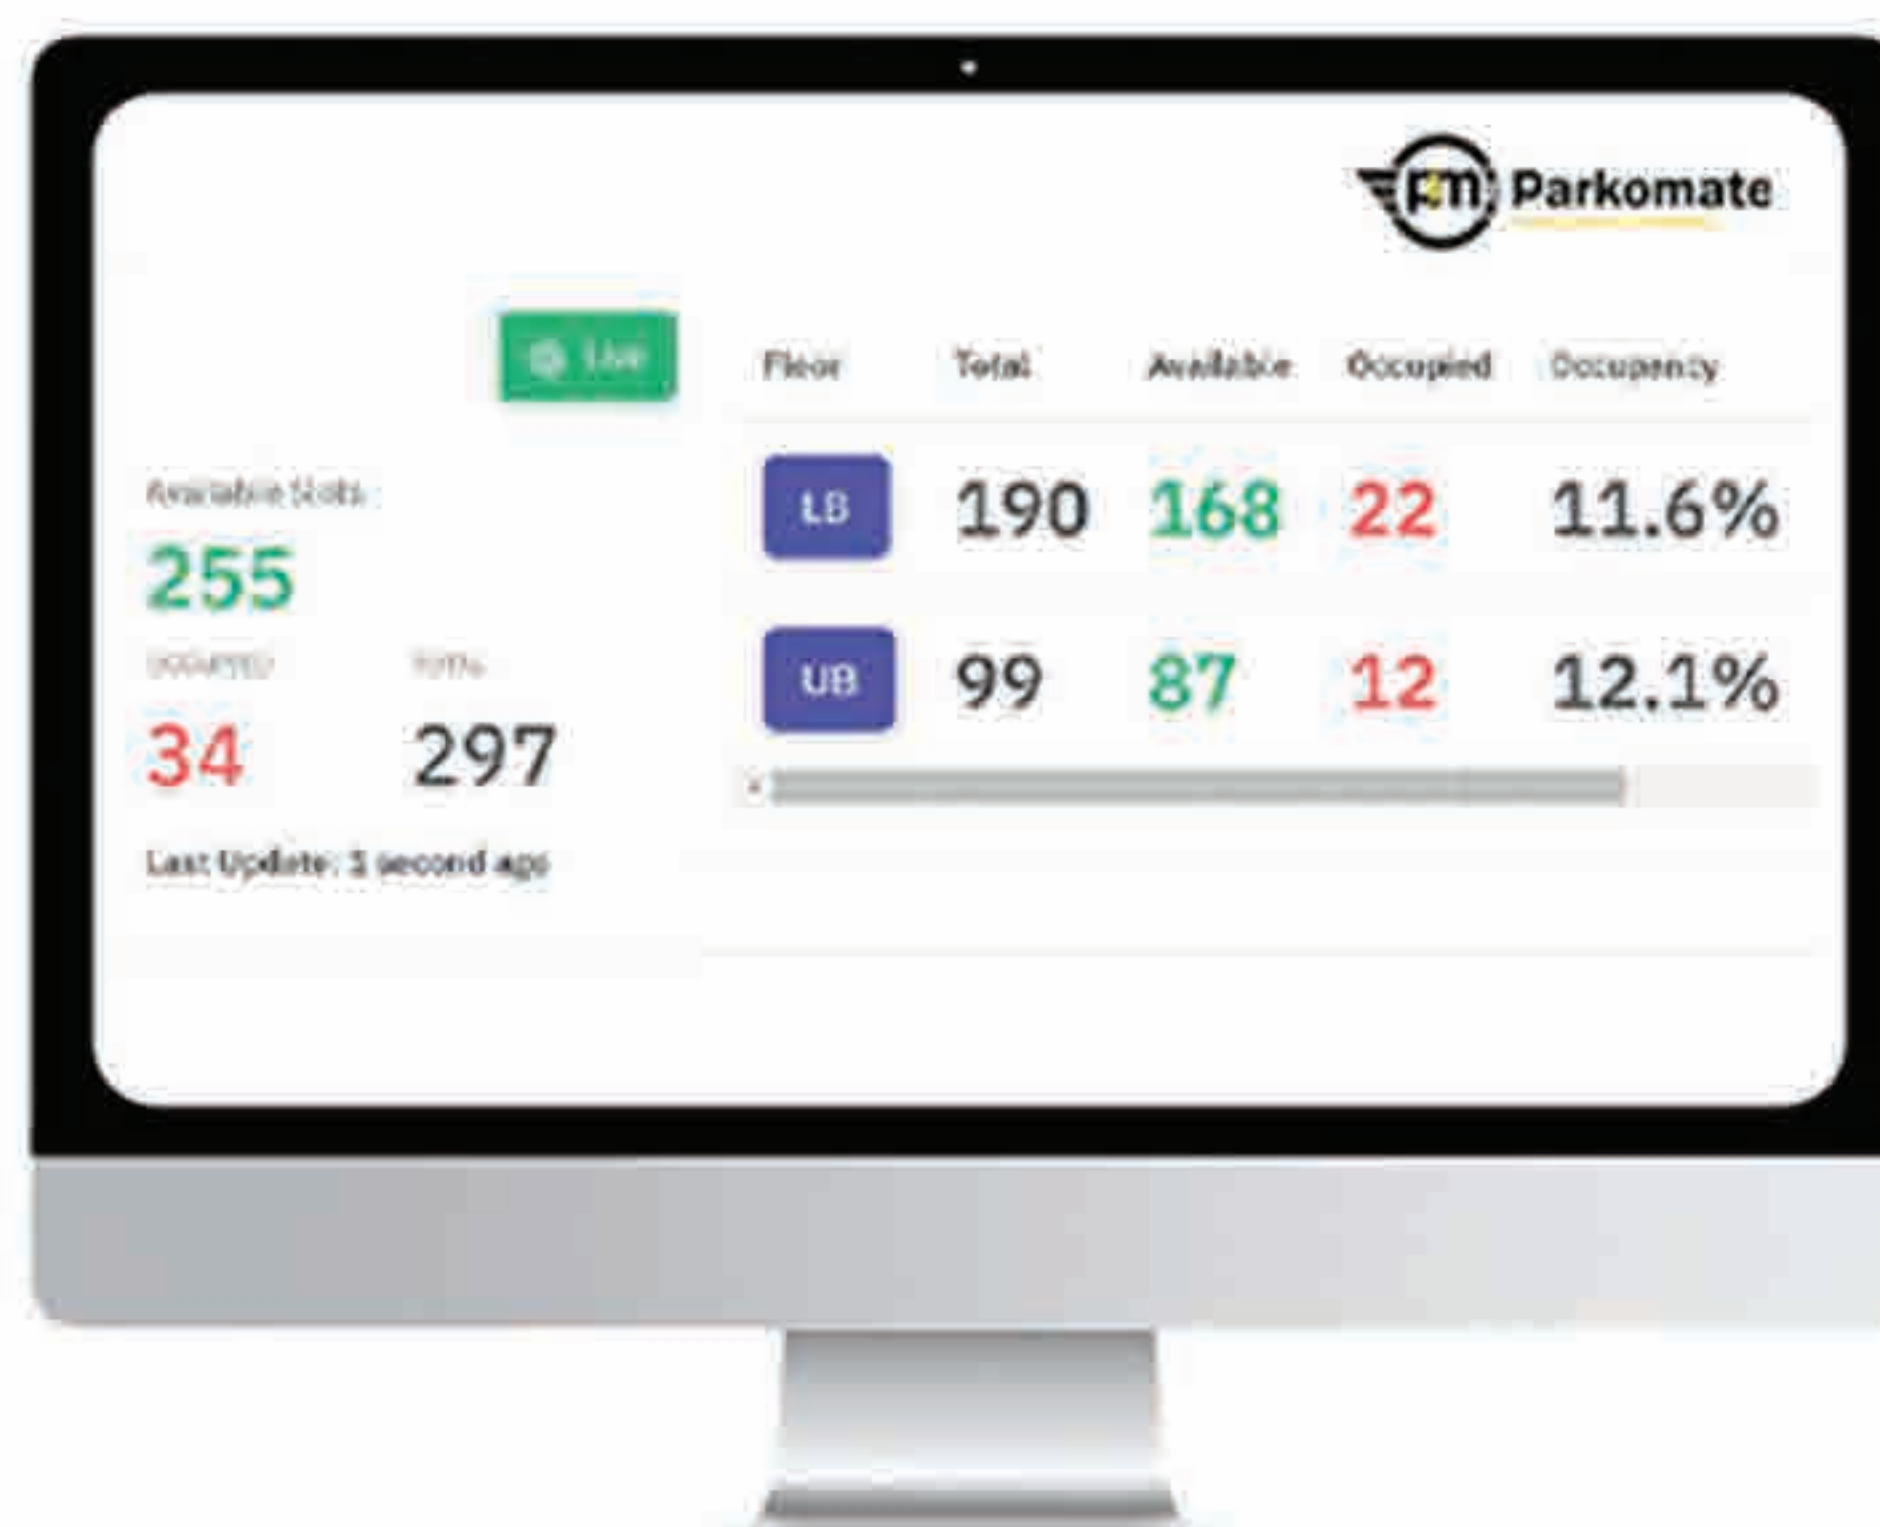

Space Parking Sensor

Provide real-time occupancy data to reduce search times, enhance navigation, and optimize space utilization

Digital Display

Customizable digital display units, including directional, floor, and main units, show real-time parking availability and messages

Parkministrator

PARKMINISTRATOR offers real-time occupancy tracking and reporting to streamline parking management and utilization

PARKING DEMARCATION SOLUTIONS

Organize parking with our premium Parking Demarcation solutions. High-visibility markings, durable signages, and reflective tapes ensure efficient traffic flow and optimal space use. Ideal for residential, commercial, and public spaces.

Pedestrian Crossings

Highlight safe crossing areas, creating a safer environment for pedestrians in high-traffic zones, promoting safety awareness

Directional Arrow Markings

Guide drivers smoothly through parking lots or complex roadways, ensuring seamless navigation and reducing confusion

Parking Bay Markings

Clearly define parking areas for organized and efficient use of available space, enhancing overall parking flow

Parking Slot Numbering

Simplify parking management with clearly marked slot numbers for easy identification, tracking, and optimized space allocation

Central line Markings

Clearly delineate lanes or boundaries within parking areas, ensuring safe & organized traffic flow while preventing crossovers
