ABOUT US

Parkomate Solutions is a top provider of comprehensive parking guidance systems by utilizing our sensors, controllers, and software to offer real-time parking status updates. Our goal is to enhance parking guidance, boost safety, and optimize space utilization for our clients, while also enhancing customer satisfaction and the overall perception of their establishments

Feature/Aspect	Parkomate	Others
Origin	Made in India	Imported from other countries
Service Capability	Direct manufacturer with expert support	Limited insight; often rely on imports
Design Flexibility	Offers customizable design options	Restricted to pre-existing solutions
Customization	Tailors solutions based on client needs	Limited to available products
Experience	Extensive experience in product execution	Varies; often less hands-on experience
Installation Expertise	Best positioned for installation	May lack deep knowledge of the product
Post-Sales Service	Provides unmatched post-sales support	Generally offers limited post-sales assistance

WHAT'S YOUR KEY REASON?

STANDARD ADHERENCE

Solutions that prioritize essential sensors and indicators to meet regulations, ensuring safety and compliance

OPERATIONAL EFFICIENCY

Integrated systems that combine sensors and indicators with user friendly dashboards for enhanced monitoring and efficient resource management

CUSTOMER CONVENIENCE

Comprehensive solutions that feature sensors, indicators, dashboards, and display units to optimize resource usage and improve operational effectiveness.

ENHANCED EXPERIENCE

All-inclusive packages offering a complete suite of sensors, indicators, dashboards, and customization options for an elevated and luxurious experience.

6 SIMPLE STEPS TOWARDS HASSLE-FREE PARKING

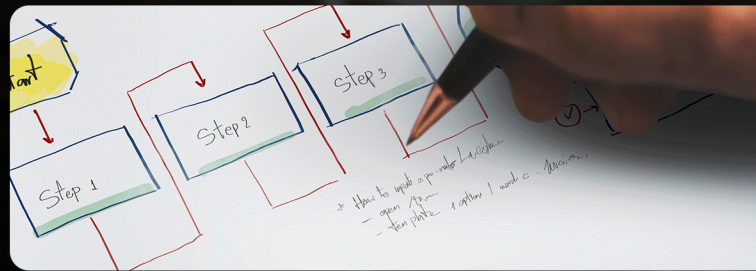

CONSULTATION

We tailor our approach to meet our clients' specific needs, budget, and objectives

SITE ASSESSMENT

We conduct site studies to optimize product placement and installation.

SOLUTION DESIGN

We create tailored solutions that fit your budget and site specific needs.

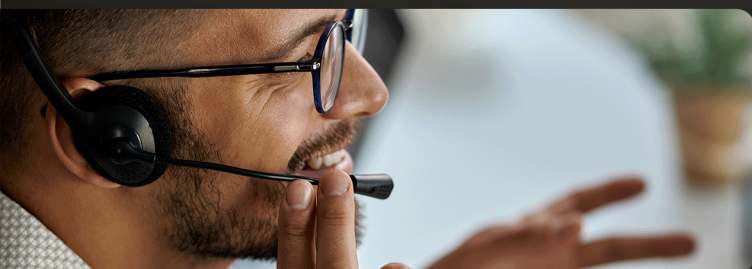

INSTALLATION

Reliable project execution with a fixed BOQ, ensuring timely delivery and regular updates.

TRAINING

We train your team for optimal system operation.

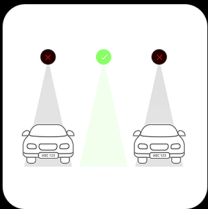

SUPPORT AND MAINTENANCE

We provide comprehensive training to your onsite team for seamless system operation.

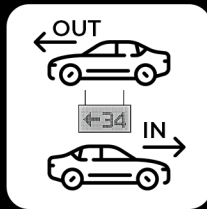

PARKING GUIDANCE SYSTEM

Streamline your parking operations with our advanced Indoor Sensor-Based Parking Guidance Solution. This system uses real-time sensors to guide vehicles to available spots, reducing congestion, search time, and maximizing space utilization. It creates a modern outlook for your establishment while providing customers with convenience, saving them fuel, time, and money. Experience optimal performance for parking facilities of any size and discover the future of parking management today.
